

# Product Safety Information

## AkzoNobel Powder Coatings

Industrial powder coatings are typically produced by blending and extruding together resins, curing agents, pigments and additives. The resultant matrix is ground into fine discrete particles. Powder coating is applied as a free-flowing, dry powder.

AkzoNobel Powder Coatings designs, manufactures and supplies powder coatings for industrial applications. Powder coatings offer inherent health, safety and environmental benefits compared with some other Suppliers of coating systems.

Akzo Nobel products (powder coatings) produced for Deacero, once applied and cured are 100% free of Triglycidyl Isocyanurate (TGIC) and 100% free of Volatile Organic Compounds (VOC).

### Important note

The information in this sheet is not intended to be exhaustive and is based on the present state of our knowledge and on current laws: any person using a product for any purpose other than that specifically recommended in the technical data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. It is always the responsibility of the user to take all necessary steps to fulfil the demands set out in the local rules and legislation. Always read the (Material) Safety Data Sheet and the Technical Data Sheet for the product if available. All advice we give or any statement made about the product by us (whether in this sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing otherwise, we do not accept any liability whatsoever for the performance of the product or for any loss or damage arising out of the use of the product. All products supplied and technical advice given are subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this sheet is subject to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to verify that this sheet is current prior to using the product. Brand names mentioned in this data sheet are trademarks of or are licensed to AkzoNobel.
